Users' Reviews

We tested the Snow Eye distance camera in our center. Many users found it a great help in daily life. Some of them connected Snow Eye with their computer, while some of them use laptop or Zoomax Snow 12. It doesn't need any firmware installation and definitely easy for the setup. The optical zoom brings amazing picture quality! We all love it!

Low Vision Center – April, 2024, USA

Snow Eye is my most favorite low vision aids at Sighticiy 2024! I love its compact design and extremely superior image quality. My vision is very bad. It is unbelievable that I could see things ten meters away clearly with the help of Snow Eye! Really hope it will benefit more people with vision loss.
